

CRT + TBS

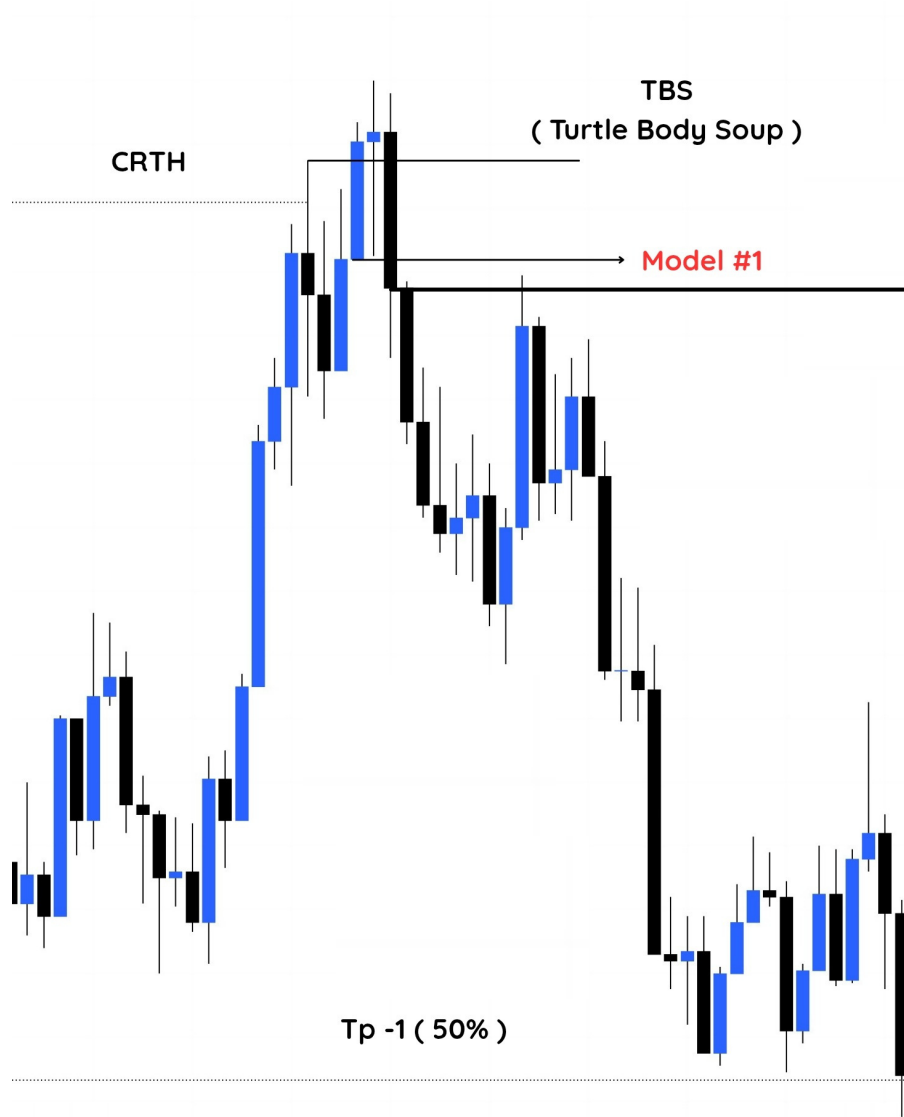

Entry with breakeven and takeprofit

AR 

@ashikruben369

**At first let's see where to take the
entry on LTF after TBS done**

Enter here

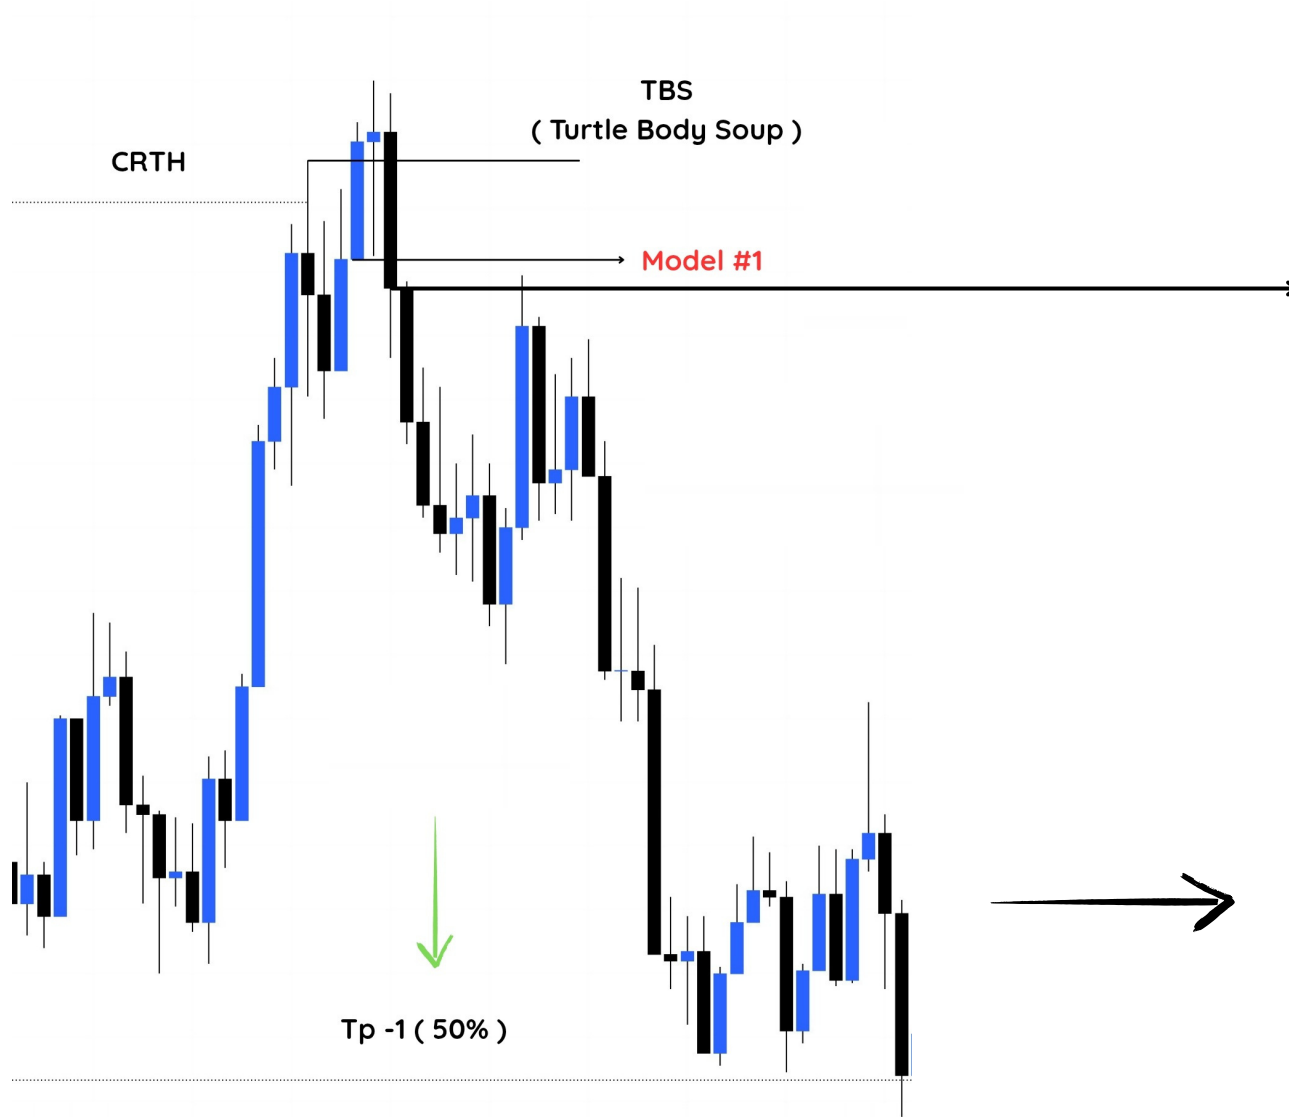

After **Model #1 confirmation done we
need to wait for the next upcoming
candles to close below the **Model #1****

Now lets see about **takeprofit and
breakeven**

Only after **takeprofit -1 hitted we
need to place the breakeven**

Don't place the **breakeven before the
takeprofit -1 hits**

**Don't worry I will explain you all on
chart clearly**

We need to place the **breakeven** here on the same area where took the entry

After **tp -1** done we need to place the breakeven on the area where we took the **entry**

**Only after placing breakeven we need
leave the trade for **tp -2****

**Once you go through this PDF you will
clearly get an knowledge about when
to place the breakeven**
