Guide about Entry & Stoploss

CRT + TBS alignment

Introduction of **CRT**

CRT stands for **Candle **R**ange **T**heory, its used for HTF analysis to predict the bias (direction)**

Introduction of **TBS**

TBS stands for Turtle Body Soup , it's used on LTF for placing the entry, also TBS is used to identify the false breakout, also the founder of TBS (Turtle Body Soup) is **AR**

Introducing **AR the founder of **TBS****

I am **AR the founder of **Turtle Body Soup** -
TBS also I am the founder and CEO of
propfirmbuy.com**

CRT - Candle Range Theory

**At first we need to find the the CRT
Candle with keylevel on the HTF**

**Then we need to find the TBS with
Model #1 confirmation on LTF**

TBS - Turtle Body Soup

Guide about **CRT** Candle

If the body of the Candle is thicker than the wick it is called as CRT Candle, which means the body should be higher than the wick and the wick should be lower than the body as shown in the image

Step : 1

The body of the candle should be high

Step : 2

The wick of the candle should be low

Step : 3

A perfect CRT Candle is ready

Moreover this is the step by step procedure to find the valid CRT Candle

Also on 50% area we need to close half of our profit and we need to place the breakeven and we need to close full profit on the CRT low

Guide about **Keylevel**

Keylevel - **OB**

Keylevel - **FVG**

Keylevel - **OHP**

Keylevel - **OLP**

These are most effective and
valid keylevels of
CRT - Candle Range Theory

**As I said before on HTF only we
need **CRT** Candle and keylevel
and now let's see the HTF real
chart examples of each keylevel
with **CRT** Candle and Keylevel**

CRT Candle with keylevel - OHP

CRT Candle with keylevel - OLP

CRT Candle with keylevel - OB

CRT Candle with keylevel - FVG

The above mentioned chart examples are the HTF - Higher Timeframe analysis of **CRT by finding the **CRT** Candle and keylevel ,after we got the **CRT** Candle with any of this keylevel (ohp,olp,fvg,ob) we need to wait for the 2nd candle manipulation and as soon as the 2nd candle got manipulated we need to switch to LTF and we need to place the entry by using **CRT** entry method **TBS** (Turtle Body Soup) and Model #1 confirmation...**

Guide about **TBS**

The first candle which manipulates the old high/low with a body close candle is called as **TBS** (Turtle a body Soup)

Validation rules of **TBS**

If these scenery of **TBS** (Turtle Body Soup) are founded and those TBS are called as **A+ TBS**

Guide about **Model #1**

After TBS formed the thick candle with low wicks are called as **Model #1**

Guide about **Entry & Stoploss** Sell setup

After we got our Model #1 candle we need to wait for the next upcoming candles to close below the Model #1 low and as soon as the next upcoming candle closes below the Model #1 low we need to place the entry and we need to place the stoploss on the extreme high

Guide about **Entry & Stoploss** Buy setup

After we got our Model #1 candle we need to wait for the next upcoming candles to close above the Model #1 high and as soon as the next upcoming candle closes above the Model #1 high we need to place the entry and we need to place the stoploss on the extreme low

Complete infrastructure of **CRT** - LTF entry with **TBS** and Model #1 confirmation
